## Distribution

*The spreadsheet allows you to insert additional rows in the coloured areas if you need them - but if you do add rows, you will need to check that any formulae and totals are working correctly*

*Only some elements of Distribution may be in the control of production e.g. duplication of master tapes and crew viewing copies. However, to be accurate, you will need to get figures for publicity materials, copies etc from your distributor. Alternatively persuade your distributor to reduce energy and materials use and then to offset the remainder*

*Please estimate as accurately as possible the percentage of each which is recycled/re-used or goes to waste  
Please give method of disposal - landfill/incineration/composted/donated/unknown*

## Duplication

*E.g. viewing copies and master tapes*
